

ROUTE ACCOUNTING

Alliant ROUTE ACCOUNTING

is the textile rental industry's standard for
 billing, A/R, route management and
 production reporting. Textile
 Rental managers can maximize
 their revenue by accurately invoicing
 their customers for services provided. Rich

revenue-generating features such as restocking fees, ancillary
 charges and insurance programs were designed with the assistance

of industry operators. Unlike other products in the industry,

Alliant Route Accounting is equally powerful whether your

business is uniform rental, linen supply, dust control - or a

combination of all three!

INVOICING

- › **Flexible Delivery Schedules** – The system can accommodate almost any delivery frequency - daily, weekly, every other week, and quarterly.
- › **Powerful Pricing Techniques** – Bill by soil count, by weight, flat rate and enforce customer minimum usage requirements.
- › **Adjustment Flexibility** – Invoices can be adjusted prior to or after delivery.
- › **Increase Revenue with Ancillary Charges** – The system automatically prompts users to invoice for ancillary charges such as preparation fees, emblem charges and embroidery.
- › **Email & Fax Capability** – Send invoice and statement copies to customers without leaving your desk.
- › **Customer Service** – Maintain a history of customer problems and resolutions.
- › **Special Invoices** – Orders phoned in can be quickly entered and automatically appear on route settlement sheets and production reports.
- › No need to exit system when creating invoices.
- › No need to exit system when making backups.

A / R

- › **Payment History** – Access customer invoice and payment history with the click of a mouse. When did a customer pay for a specific invoice and what was the check number?
- › **Record A/R Notes** – Enter and track notes for A/R collection. Use the A/R call-back report as a checklist for follow up.
- › **Multiple Statement Options** – Take advantage of multiple options for billing. Our plain paper statement form allows customers to receive via mail, fax or email.

PRODUCTION

- › **Flexibility** – Production reports can be printed to accommodate bulk loading or customer-specific loading.
- › **Mat Load Lists** – Ability to generate mat-specific load lists.
- › **Holiday Production Options** – Reporting can accommodate holiday weeks where standard delivery schedules may change significantly.
- › **Forecasting** – Print production reports prior to generating invoices. What would production be if invoices were generated now?

REPORTING

- › **Use Plain Paper** – All reports designed to print on 8 1/2 X 11 plain, bond paper.
- › **Powerful Sales Reporting** – Users can customize sales reports to print for a specific customer, route, or date range.
- › **Data Mining** – All data is stored in an ODBC-compliant SQL Server database and can be queried utilizing products such as Crystal Reports.
- › **Web Access** – Your customers can login to your website and view account information, see their invoices and make service requests 24 X 7.
